JOURNAL OF COMPUTATIONAL AND APPLIED MATHEMATICS

Author Index Volume 90 (1998)

Álvarez-Nodarse, R., see **Arvesú, J.** 135–156
Alzer, H., A harmonic mean inequality for the gamma function [J. Comput. Appl. Math. 87 (1997) 195–198] (*Corrigendum*) 265
Area, I., see **Ronveaux, A.** 45– 50
Arvesú, J., R. Álvarez-Nodarse, F. Marcellán and **K. Pan,** Jacobi–Sobolev-type orthogonal polynomials: Second-order differential equation and zeros 135–156

Babuška, I., J. Hugger, T. Strouboulis, K. Copps and **S.K. Gangaraj,** The asymptotically optimal mesh-size function for bi-p degree interpolation over rectangular elements 185–221
Bavinck, H., Some new results for Charlier and Meixner polynomials 51– 56

Chen, B. and **F. Solis,** Discretizations of nonlinear differential equations using explicit finite order methods 171–183
Copps, K., see **Babuška, I.** 185–221
Coulibaly, I., see **Lécot, C.** 25– 44

Davydov, O.V., G. Nürnberger and **F. Zeilfelder,** Approximation order of bivariate spline interpolation for arbitrary smoothness 117–134

Endresen, L.P. and **J. Myrheim,** A formula for step-length control in numerical integration (*Letter to the Editor*) 263–264

Feng, B.-F. and **T. Mitsui,** A finite difference method for the Korteweg–de Vries and the Kadomtsev–Petviashvili equations 95–116

Gangaraj, S.K., see **Babuška, I.** 185–221
Godoy, E., see **Ronveaux, A.** 45– 50

Hadjidimos, A., D. Noutsos and **M. Tzoumas,** Towards the determination of the optimal *p*-cyclic SSOR 1– 14
Hugger, J., see **Babuška, I.** 185–221

Klar, A., see **Tiwari, S.** 223–237
Koepf, W. and **D. Schmersau,** Representations of orthogonal polynomials 57– 94

Laburta, M.P., Construction of starting algorithms for the RK–Gauss methods 239–262
Lécot, C. and **I. Coulibaly,** A particle method for some parabolic equations 25– 44
López, J.L., Several series containing gamma and polygamma functions 15– 23

Marcellán, F., see **Arvesú, J.** 135–156
Mitsui, T., see **Feng, B.-F.** 95–116
Myrheim, J., see **Endresen, L.P.** 263–264

Noutsos, D., see **Hadjidimos, A.** 1– 14
Nürnberger, G., see **Davydov, O.V.** 117–134

Pan, K., see **Arvesú, J.** 137–158

Ronveaux, A., E. Godoy, A. Zarzo and **I. Area,** Fourth-order difference equation for the first associated of classical discrete orthogonal polynomials 45– 50

Schmersau, D., see **Koepf, W.** 57– 94
Solis, F., see **Chen, B.** 171–183
Strouboulis, T., see **Babuška, I.** 185–221

Tagliani, A., Inverse two-sides Laplace transform for probability density functions 157–170
Tiwari, S. and **A. Klar,** An adaptive domain decomposition procedure for Boltzmann and Euler equations 223–237
Tzoumas, M., see **Hadjidimos, A.** 1– 14

Zarzo, A., see **Ronveaux, A.** 45– 50
Zeilfelder, F., see **Davydov, O.V.** 117–134
